- PHP / Laravel / SQL

TOOLS

Figma

Illustrator

Photoshop

After Effect

- Git / Agile Methodology

Certification

Opquast – Integrate quality assurance rules and vocabulary into professional web practice – Level Avancé

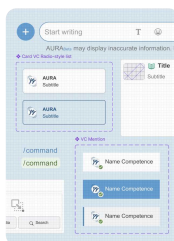

Sélène Boullée

Hello !

With experience in UX design and web development, I navigate between technical reliability, development efficiency and user needs. Understanding the different roles within a team allows me to act proactively rather than simply receiving briefs. I prioritize clarity over trends, as being useful will always have more impact than a fleeting trend.

My projects

[View my portfolio](#)

Agentic Design Systems: Powering AI-driven interface generation and governance.

Restructure the design system into machine-readable metadata so AI agents can generate and govern interfaces, while keeping humans accountable

Impact : Streamlining workflows by replacing trial-and-error with intent-driven AI generation.

Work on this project is still in progress

Pluka – Making evidence-based alternative medicine accessible

Redesigning a professional healthcare app prioritizing user experience and accessibility while respecting scientific rigor

Méthode : Product audit, user research, roadmap, atomic design

Impact : Transformation from a B2B expert tool into an accessible and engaging health companion.

Experience

INTERNSHIP – UX/UI DESIGNER – DESIGN SYSTEM

2026 (6 months)

Dassault Systèmes (Delmia)

Paris

- Integrating an AI assistant into complex supply chain and mBOM workflows through UX benchmarks, wireframing, and design guidelines.
